Personnel Recruiting

Position: Senior Safety Engineer

Company Info: Our client is one of the world's leading manufacturers of precision-engineered offshore drilling and production equipment that is well suited for use in deepwater and harsh environment applications. The Company designs and manufactures subsea, surface and offshore rig equipment for use by oil and gas companies in offshore areas throughout the world.

Location: Houston, TX

Job Description: This person will join a team of 8 ehs professionals in this 1000+ employee heavy manufacturing facility on over 200 acres. This person will be the driver for HSE Management systems which this company is pursuing globally and will be working with management professionals of all levels. The position reports to the International HSE Manager.

Qualifications: The ideal candidate will have 5+ years of Safety experience from a large manufacturing facility (500+ employees), a BS in Safety or related, the ability to work with all levels of management, strong interpersonal presence and experience in HSE Management Systems. There is currently no relocation assistance available.

Position: EH&S Manager

Location: Houston, TX area

Company Info: Our client, a 125+ year old publicly traded company with approximately \$15B in sales, is a leader in the coatings and specialty products serving customers in construction, consumer products, industrial and transportation. This company has facilities in 60 countries. The plant in the Houston area has approximately 100 employees.

Job Description: This position is responsible for the management of the EHS process. This is accomplished through assisting in the development of cost-effective management systems and programs that assure compliance with regulatory and policy requirements, drive and measure continuous performance improvement, and

operate in the spirit of Responsible Care. This includes over-all responsibility for all elements of safety, including Safe Work Practices, Accident Investigation Analysis, Process Safety, Contractor Safety, and Responsible Care. In addition, he or she will be accountable for overseeing all Worker's compensation issues, and for all Safety and Health training. Other areas of responsibility include off the job safety, wellness efforts, and employee health and medical/disability management. Working in conjunction with the Environmental Engineer on site, the EH&S Manager will oversee all Environmental issues, ensuring all compliance is met with Federal, State, and corporate regulations related to environmental, health, and safety. The EHS Manager will play a leading role in the plant's Community Outreach efforts. The incumbent is a key member of the plant management's staff and participates in key business strategic initiatives, quality initiatives, community communications, and focused efforts with the Quality Leadership teams. Incumbent will maintain and promote measures to prevent any significant adverse affect on company employees, customers, general population, or the environment and will comply with all applicable laws and regulations relating to Company's Corporate EH&S Policy relating to Safety and the Environment. This person reports to the Plant Manager and will initially have 2 direct reports; an environmental engineer and an adman.

Qualifications: Successful candidates must have B.S. in Safety, Environmental Science or related along with 5+ years of experience (including supervisory) in a manufacturing environment, preferably a petrochemical or chemical facility. The incumbent must have a working understanding of OSHA, Regulatory Compliance; experience with inspections, hazard reviews, and safety analysis. The candidate's strength should be in safety and health. In addition, the incumbent must have problem solving and strong communication skills and the ability to work independently or in team environment.

Position: Safety, Health and Security Manager

Location: Southwestern LA

Company Info: Our client, a 125+ year old publicly traded company with approximately \$15B in sales, is a leader in the coatings and specialty products serving customers in construction, consumer products, industrial and transportation. This company has facilities in 60 countries.

Job Description: The incumbent role is to promote and participate in plant initiatives aimed at ensuring a safe, healthy, work environment and regulatory compliance with safety programs. Serves as the local subject matter expert in the regulatory compliance of safety programs for specific manufacturing units. Participate in risk recognition and reduction efforts. This position reports to the Plant Manager at a plant of 1000+ employees.

Qualifications: Successful candidates must have B.S. in Safety or related along with 8+ years of experience (including supervisory) in a manufacturing environment, preferably a petrochemical or chemical facility. The incumbent must have a working understanding of OSHA, Regulatory Compliance; experience with inspections, hazard reviews, and safety analysis.
